
TABLE OF CONTENTS

ABOUT THE AUTHOR	vii
PREFACE	ix
ACKNOWLEDGMENTS	xi
INTRODUCTION	xiii
How to Use This Book	xiii
Getting Started With the hp 33s	xiv
Equation Mode Versus Programming	xviii
REFERENCES	xix
LIST OF EQUATIONS	1
PART A: STORING EQUATIONS	9
Fluids	
1. Pressure on a Submerged Inclined Rectangular Plane Surface	9
2. Bernoulli's Equation (U.S. units)	10
3. Reynold's Number	12
4. Cross-Sectional Area of a Pipe (Diameter in inches, area in square feet)	13
5. Area in Flow in Pipe	14
6. Darcy Friction Factor	16
7. Darcy Equation	18
8. Horsepower of a Pump (U.S. units)	19
9. Time to Empty a Tank	20
10. Throat Velocity in a Venturi Meter (U.S. units)	22
11. Hydraulic Horsepower	23
12. Specific Pump Speed (U.S. units)	24
13. Fan Curve	25

Thermodynamics

14. Ideal Gas Law 26
 15. p - v Polytropic Law 27
 16. T - p Polytropic Law 28
 17. Carnot Efficiency 29
 18. Otto Cycle Efficiency 30
 19. Plan Formula for Horsepower (U.S. units) 31
 20. Speed of Sound in Air (U.S. units) 32

Heat Transfer

21. Overall Heat Transfer 33
 22. Radial Heat Transfer (Insulated pipe) 34
 23. Newton’s Equation of Cooling 36
 24. Logarithmic Temperature Difference 38
 25. Logarithmic Mean Area 39
 26. Number of Transfer Units 40
 27. Emissivity Factor for Two Infinite Parallel Planes 41
 28. Biot Number 42

HVAC and Refrigeration

29. Load From Enthalpy (U.S. units) 43
 30. Sensible Heat Ratio 44
 31. Bypass Factor 45
 32. Mixing Airstreams 46
 33. Equivalent Diameter of Rectangular Duct 47

Strength of Materials

34. Maximum Principal Stress 48
 35. Minimum Principal Stress 49
 36. Extreme Shear Stress 50
 37. Parallel Axis Theorem 51

Machine Design

38. Critical Load for Slender Columns 52
 39. Maximum Deflection of a Simple Elastic Beam 54
 40. Spring Constant 55
 41. Wahl Correction Factor 56
 42. Critical Speed of a Shaft 57
 43. Tensions on Belts 58
 44. Cylindrical Pressure Vessel Wall Thickness 59

Dynamics

45. Uniform Acceleration 61
 46. Range of Projectile Motion (Target below) 62
 47. Centripetal Force 64

Engineering Economics

48. Present to Future Value of Money 65
 49. Present Value to Uniform Payment 66
 50. Depreciation Based on Sum of Years 67

PART B: PRACTICE PROBLEMS USING STORED EQUATIONS 69

PART C: PRACTICE PROBLEMS USING HP 33S BUILT-IN FUNCTIONS 93

Complex Numbers: Multiplication 93
 Complex Numbers: Rectangular to Polar Conversion 94
 Statistics: Mean and Standard Deviation 95
 Probability: Combinations 96
 Computer Mathematics: Base Conversion 96

PART D: PRACTICE PROBLEMS USING ALGEBRAIC MODE 99

Complex Numbers: Multiplication 100
 Complex Numbers: Rectangular to Polar Conversion 101
 Probability: Combinations 102

PART E: QUICK REFERENCE 103
