

## How to Use These Cards

The *Interior Design in a Flash* cards are organized by the content areas in the NCIDQ exam Sections 1 and 2. Exam Section 3 is a design practicum with seven exercises that will test your knowledge about key interior design terms, which are also covered by these cards. Trigger your memory by using the cards either front to back (in question-and-answer format) or back to front—since you never know when or in what context a term or concept will be used. After an initial pass, shuffle the deck for a blend of subjects. Quiz yourself, or team up with others for interactive learning at work or school.
