# Table of Contents

**PREFACE AND ACKNOWLEDGMENTS** ................................................................. v  
**INTRODUCTION** .............................................................................................. vii  
**CODES, STANDARDS, AND REFERENCES USED IN THIS BOOK** .............. xi  
**NOMENCLATURE** ........................................................................................... xiii  

**TOPIC I: Structural Analysis**  
Structural Analysis Problems .............................................................................. 1-1  
Structural Analysis Solutions .............................................................................. 1-9  

**TOPIC II: Structural Concrete Design**  
Structural Concrete Design Problems ................................................................. 2-1  
Structural Concrete Design Solutions ................................................................. 2-20  

**TOPIC III: Structural Steel Design**  
Structural Steel Design Problems ....................................................................... 3-1  
Structural Steel Design Solutions ....................................................................... 3-16  

**TOPIC IV: Seismic Design**  
Seismic Design Problems .................................................................................. 4-1  
Seismic Design Solutions .................................................................................. 4-9  

**TOPIC V: Foundations and Retaining Structures**  
Foundations and Retaining Structures Problems ............................................... 5-1  
Foundations and Retaining Structures Solutions ............................................... 5-3  

**TOPIC VI: Timber Design**  
Timber Design Problems .................................................................................... 6-1  
Timber Design Solutions .................................................................................... 6-22  

**TOPIC VII: Masonry Design**  
Masonry Design Problems .................................................................................. 7-1  
Masonry Design Solutions .................................................................................. 7-3
